Product Description

This equipment is specialized equipment designed for rolling characters, patterns and other signs on the outersurface of steel pipes. This equipment consists mainly of an electronic control system, a hydraulic system, a rollingword system, and a positioning adjustment system. The electronic control system for this equipment features a touchscreen as a man-machine interface, which is user-friendly and intuitive to use. The hydraulic system provides power and controls the rolling word cylinder which pushes the steel pipe. This equipment has the capability to quickly mold change.
