## Product Description

This equipment is specialized equipment designed for rolling characters, patterns and other signs on the outer surface of steel pipes. This equipment consists mainly of an electronic control system, a hydraulic system, a rolling word system, and a positioning adjustment system. The electronic control system for this equipment features a touch screen as a man-machine interface, which is user-friendly and intuitive to use. The hydraulic system provides power and controls the rolling word cylinder, which pushes the steel pipe. This equipment has the capability to quickly mold change. (With the font produced by our company, the mold change can be completed in about 1 minute after proficiency).

S/N	Item	Parameter	Remarks
1	Steel pipe diameter $\varnothing D$	$\varnothing 30 \sim \varnothing 100\text{mm}$	
2	Scroll area length A	$\leq 150\text{mm}$	
3	Scroll area width B	$\leq 70\text{mm}$	
	Distance from roll area to tube end C	$\leq 200\text{mm}$
