

HGQBSLJ-N

Our Product Introduction

Basic Information

- Place of Origin: CHINA
- Brand Name: THOBO
- Minimum Order Quantity: 50

Product Specification

- Highlight: shock absorber machine,
0.8MP Shock Absorbing Equipment

Product Description

This equipment is designed to detect the airtightness of the welded end of the bottom cover and the peripheral welded parts of the automobile shock absorber liquid storage cylinder assembly. The leak test type is a horizontal full submersible type. After passing through the sealed port, the entire workpiece is submerged in water, and then compressed air is filled into the assembly. The welding workpiece's airtightness is judged by observing whether there are bubbles overflowing on the water surface. The time for sinking, airtightness detection, and control can be adjusted using a hand pull switch.

S/N	Item	Parameter	Remarks
1	Reservoir diameter ϕ D	$\phi 30 \sim \phi 65\text{mm}$	
2	Tank assembly length L	100~550mm	
3	Maximum outer diameter of spring disc ϕ D1	$\leq 280\text{mm}$	
4	Maximum detection pressure	0.8MP
