Product Description

This assembly machine is specialized equipment designed for the assembly of the internal bottom valve system of the automobile shock absorber. The tightening of the nut and pressing of the cylinder are performed. The assembly table consists of a valve assembly station, a nut tightening station, and a cylinder pressure assembly station. The assembly station has a valve selection mechanism that can push out 6 different valve plates at once. After assembly, the bottom valve nut is locked and then transferred to the pressing station for bottom valve pressing.

S/N	Item	Parameter	Remarks
1	Working cylinder diameter	φ 20 ~ φ 50 mm	
2	Working cylinder height	80mm~500mm	
3	Pressing force	15kN (0.5MPa)	
4	Valve selection quantity	6 kinds	
5	Tightening machine	Optional as required
