

## HGDAJYJ-CS6 shock absorber machine 6 stations

### Basic Information

- Place of Origin: CHINA
- Brand Name: THOBO
- Minimum Order Quantity: 50

### Product Specification

- Highlight: shock absorber machine 6 stations,  
6 stations shock absorber test machine

## Product Description

This equipment is designed for adding working oil to automobile shock absorber assembly. This equipment adopts the six-station turntable cycle rotary refueling mode. It consists of two parts: the fuel tank cabinet and the refueling turntable, mainly composed of the frame, the electronic control system, the refueling system, the oil replenishment system and the refueling turntable system. The electronic control system of this equipment adopts the combination of microcomputer and touch screen to control and set, and can set its refueling parameters separately according to the different viscosity of the oil to achieve accurate refueling volume. The level control switch is used to control the amount of oil stored in the tank. When the amount of oil stored is lower than the lower limit, the equipment replenishes the external oil into the tank by itself to ensure the normal progress of the process.

S/N	Item	Parameter	Remarks
1	Single refueling volume	0~999ml	
2	Total height of workpiece	≤600mm	
3	Precision	±5ml	
4	Turntable station	6 stations
