

Reference No SSA02780N Pneumatic Shock Absorber Compatible With Cadillac Escalade 2004-2013 Heavy Duty Replacement Part

Our Product Introduction

Basic Information

Product Specification

- Product Name: Suspension System
- Car Model: For Cadillac Escalade 2004-2013
- Car Make: European Cars
- Dampingtype: Adjustable Air Damping
- Color: Black
- Year Of Model: 2011 - 2013 / 2014 - 2021 / 2017 - 2021
- Single Gross Weight: 9.0 Kg
- Productname: Air Shock Absorber
- Highlight: **Pneumatic shock absorber for Cadillac Escalade**
, Heavy duty air shock absorber replacement,
Cadillac Escalade 2004-2013 shock absorber

Product Description

Pneumatic Shock Absorber for Cadillac Escalade 2004-2013

Product Overview

This high-quality pneumatic shock absorber provides superior vibration damping and impact absorption across diverse applications. Engineered for precision and durability, it delivers consistent performance and reliability in industrial machinery, automotive suspensions, and specialized equipment.

Key Features

- Advanced Pneumatic Shock Absorber technology for enhanced ride comfort
- Air Spring Shock Absorber for superior load handling
- Reliable Air Suspension Shock Absorber for improved vehicle stability
- Extensive temperature range: -40°C to 85°C
- 20+ years of industry experience in development
- Professional black finish for corrosion protection
- Multiple payment options: TT, PayPal, Western Union

Technical Specifications

Product Name	Air Shock Absorber / Suspension System
Single Gross Weight	9.0 Kg
Package Options	Neutral / Customized Packaging / Brand
OEM Number	4F0616040AB
Reference Numbers	0296330, SSA02780N
Temperature Range	-40°C to 85°C
Compatible Models	Cadillac Escalade 2004-2013

Applications

This air suspension shock absorber is essential for heavy-duty trucks, buses, trailers, passenger cars, industrial machinery, and agricultural equipment. It ensures smooth handling by effectively absorbing shocks and vibrations on rough terrains, highways, and urban roads.

Customization Services

We provide comprehensive product customization to tailor the air cushion shock absorber to your specific vehicle requirements, ensuring enhanced ride quality and reliability for models from 2011-2013, 2014-2021, and 2017-2021.

Support & Services

Our technical support team assists with installation, maintenance, troubleshooting, product repair, part replacement, and performance optimization. Detailed installation instructions and maintenance guidelines are included with each product.

Packaging & Shipping

Each air shock absorber is securely packaged in custom-fitted boxes with protective foam inserts. Orders are processed within 1-2 business days and shipped worldwide via trusted carriers with tracking information provided.

Frequently Asked Questions

What vehicles are compatible with this Air Shock Absorber?

This air shock absorber is designed for Cadillac Escalade models from 2004-2013. Please consult our support team for specific model compatibility.

How does the Air Shock Absorber improve ride quality?

It uses compressed air to provide adjustable damping, absorbing road shocks more effectively than traditional shocks for a smoother, more comfortable ride.

Is installation difficult?

Installation requires basic mechanical skills and tools. We recommend professional installation for optimal performance. Detailed instructions are included.

Can I adjust the air pressure?

Yes, this product features adjustable air pressure settings, allowing customization of firmness and ride height based on driving preferences and load conditions.

What materials are used in construction?

The air shock absorber is constructed with high-quality steel components and durable rubber seals for long-lasting performance and corrosion resistance.
